Administrative Stuff

• Final Project (7% of your grade)

• This is due next week (during your lab)

- What to submit
 - instructions are posted on the class web page

Administrative Stuff

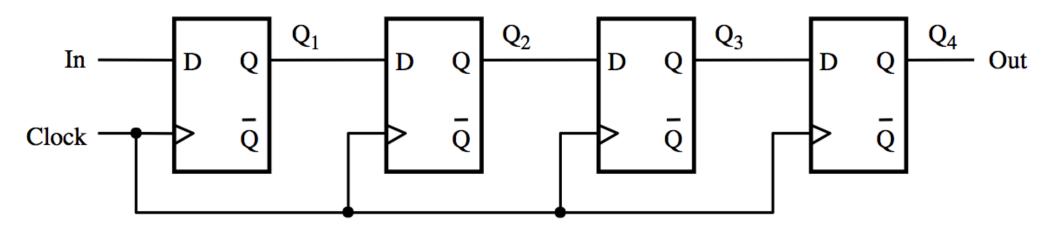

• Homework 12 is due today

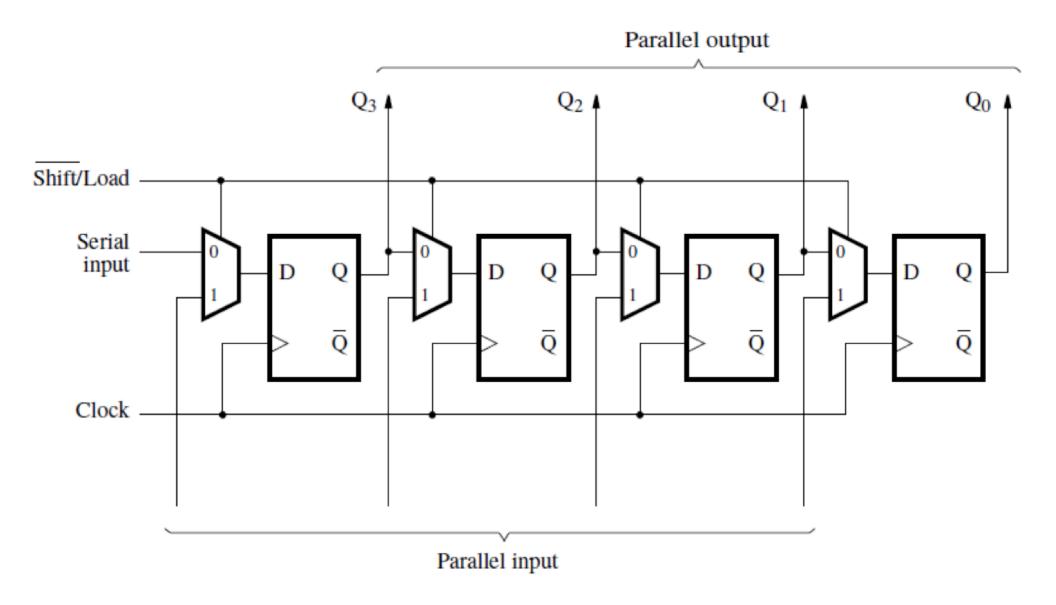

Reading Material for Today

- "The Seven Secrets of Computer Power Revealed" by Daniel Dennett.
- This is Chapter 24 in his latest book "Intuition Pumps and Other Tools for Thinking", 2013

Reading Material for Today

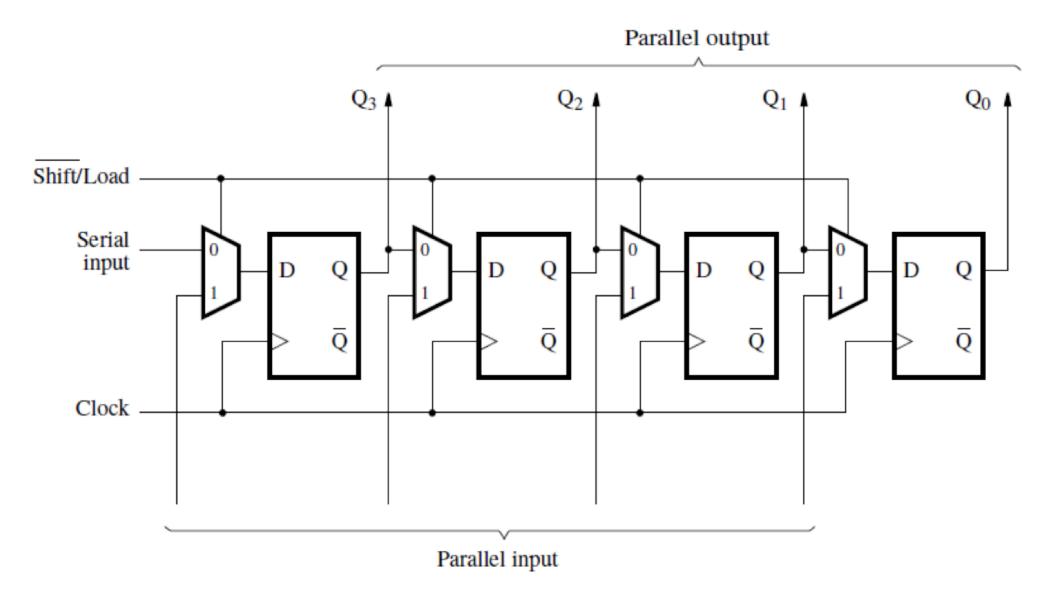

- "The Seven Secrets of Computer Power Revealed" by Daniel Dennett.
- This is Chapter 24 in his latest book "Intuition Pumps and Other Tools for Thinking", 2013
- Chapter 24 in reverse is: 42!

[Figure 5.18 from the textbook]

What can be stored in this register?

[Figure 5.18 from the textbook]

We Need a Simpler Abstraction

What can be stored in this register?

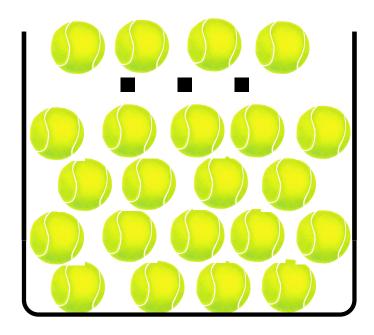

What can be stored in this register?

How many balls can be stored?

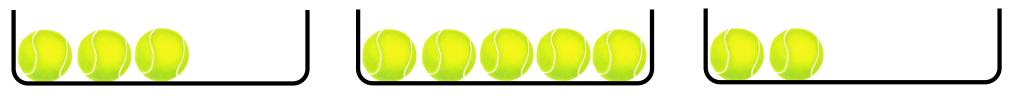

How many balls can be stored?

Infinitely Many

The registers are numbered

Register 1

Register 2

Register 3

The registers are numbered and each could store a different number of balls.

Things to Notice

- There could be many registers, not just three, as long as they are finitely many.
- The address of each register is an integer.

- Each register stores an integer number of balls.
- Storing 3.14 balls in a register is not possible.

In addition to the registers there is also a processing unit

In addition to the registers there is also a processing unit

- It operates on the registers by changing their contents
- The operations are ordered sequentially and given a number (just like line numbers in BASIC)
- There are only three possible operations
 - Increment a register and go to another step
 - Decrement a register and go to another step
 - End

Two Basic Operations (that can be performed on a register)

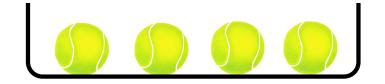

Increment the contents of a register by 1

• Decrement the contents of a register by 1

In both cases the address of the register must be given

This is our if statement

Sample Program:

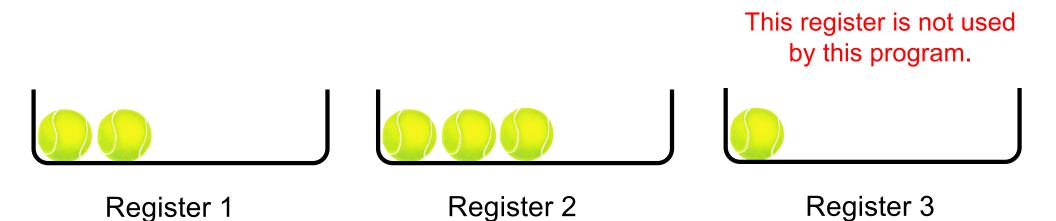

Add the contents of register 1 to the contents of register 2

STEP	INSTRUCTION	REGISTER	GO TO STEP	[BRANCH TO STEP]
1.	Deb	1	2	3
2.	Inc	2	1	
3.	End			

Sample Program:

Add the contents of register 1 to the contents of register 2

STEP	INSTRUCTION	REGISTER	GO TO STEP	[BRANCH TO STEP]
1.	Deb	1	2	3
2.	Inc	2	1	
3.	End			

Sample Program:

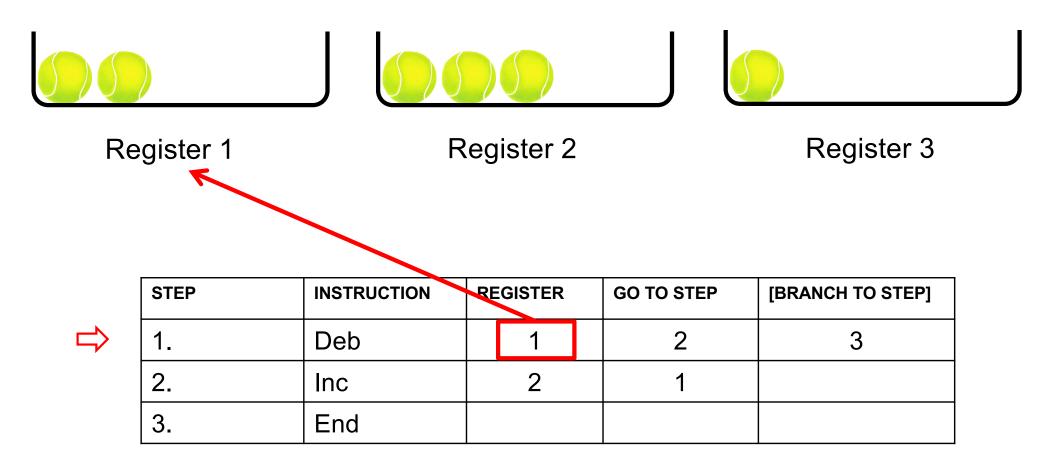

Add the contents of register 1 to the contents of register 2

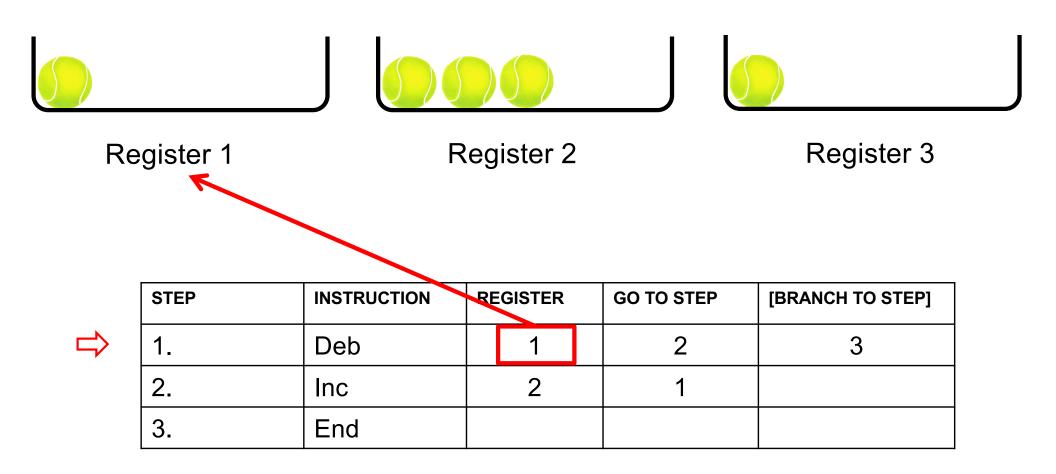

STEP	INSTRUCTION	REGISTER	GO TO STEP	[BRANCH TO STEP]
1.	Deb	1	2	3
2.	Inc	2	1	
3.	End			

	STEP	INSTRUCTION	REGISTER	GO TO STEP	[BRANCH TO STEP]
\Rightarrow	1.	Deb	1	2	3
	2.	Inc	2	1	
	3.	End			

	STEP	INSTRUCTION	REGISTER	GO TO STEP	[BRANCH TO STEP]
\Rightarrow	1.	Deb	1	2	3
	2.	Inc	2	1	
	3.	End			

	STEP	INSTRUCTION	REGISTER	GO TO STEP	[BRANCH TO STEP]
\Rightarrow	1.	Deb	1	2	3
	2. 🗲	Inc	2	1	
	3.	End			

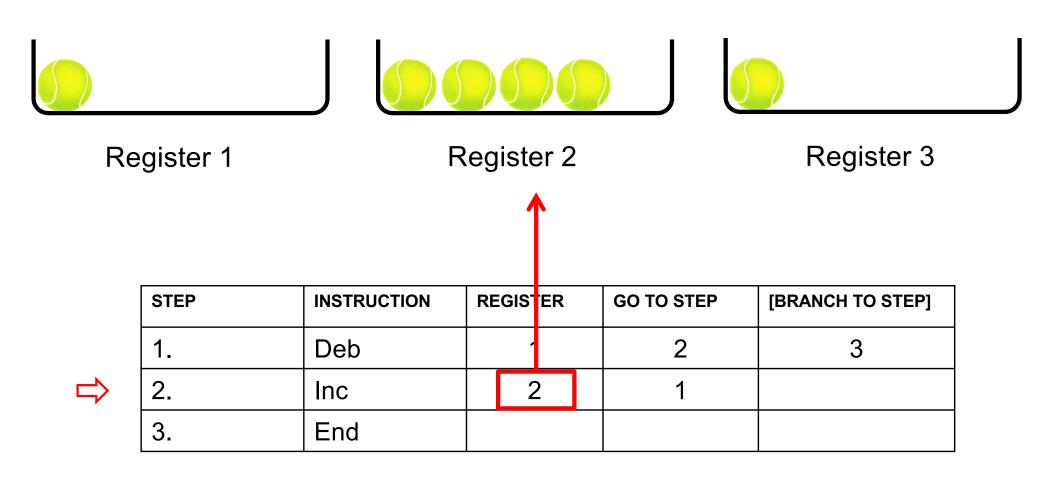

STEP	INSTRUCTION	REGISTER	GO TO STEP	[BRANCH TO STEP]
1.	Deb	1	2	3
2.	Inc	2	1	
3.	End			

STEP	INSTRUCTION	RE	GISTER	GO TO STEP	[BRANCH TO STEP]
1.	Deb		1	2	3
2.	Inc		2	1	
3.	End				

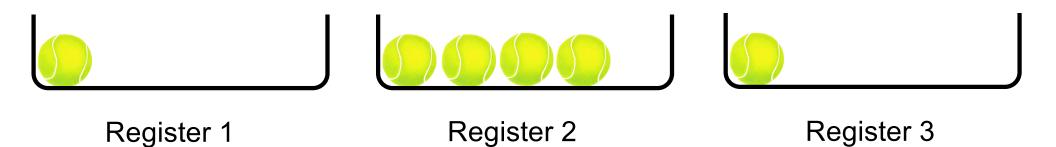

Add the contents of register 1 to the contents of register 2

Register 1

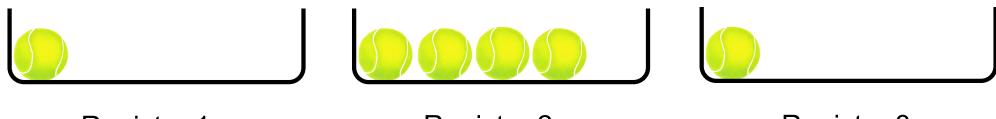

Register 2

STEP	INSTRUCTION	REGISTER	GO TO STEP	[BRANCH TO STEP]
1.	Deb	1	2	3
2.	Inc	2	1	
3.	End			

STEP	INSTRUCTION	REGISTER	GO TO STEP	[BRANCH TO STEP]
1. ←	Deb	1	2	3
2.	Inc	2		
3.	End			

Add the contents of register 1 to the contents of register 2

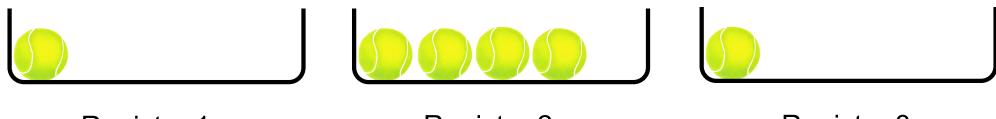

Register 1

Register 2

STEP	INSTRUCTION	REGISTER	GO TO STEP	[BRANCH TO STEP]
1.	Deb	1	2	3
2.	Inc	2	1	
3.	End			

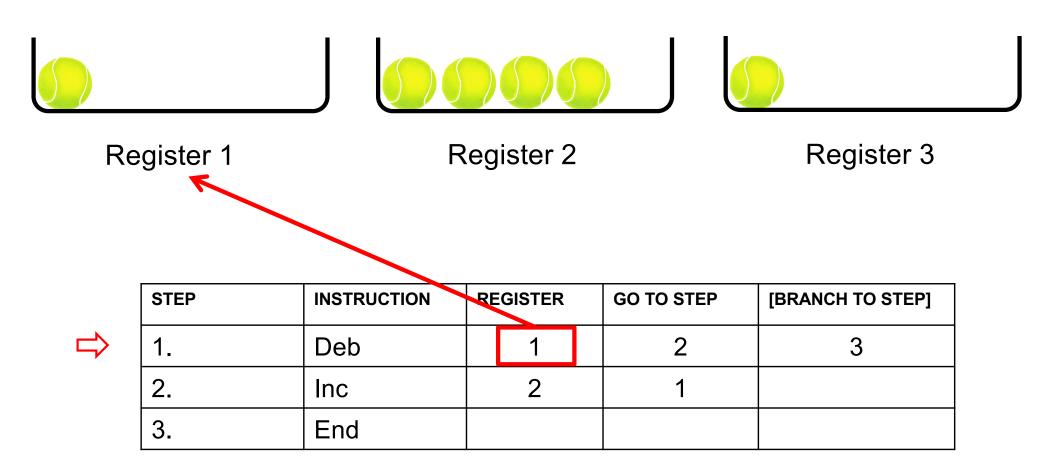

Add the contents of register 1 to the contents of register 2

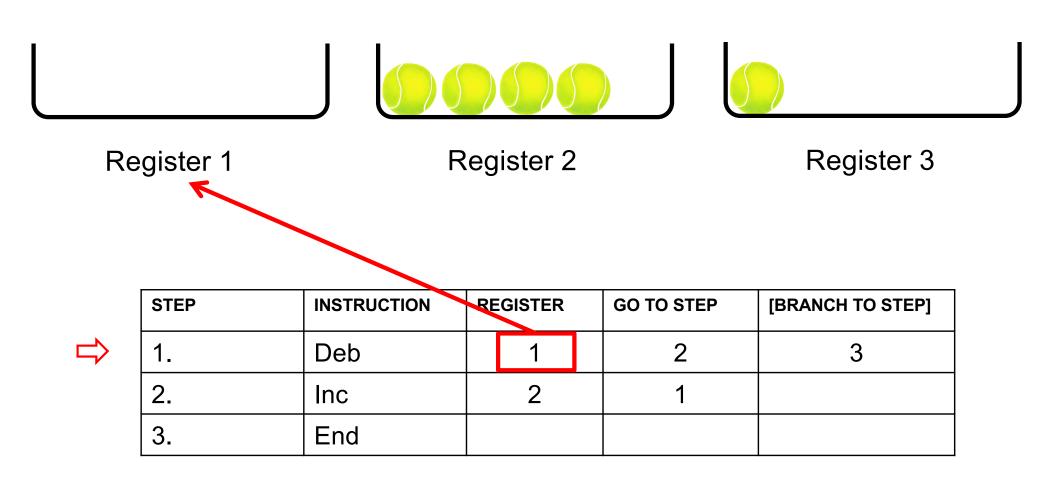

Register 1

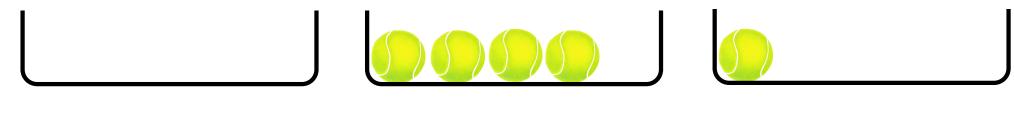

Register 2

STEP	INSTRUCTION	RE	GISTER	GO TO STEP	[BRANCH TO STEP]
1.	Deb		1	2	3
2.	Inc		2	1	
3.	End				

Add the contents of register 1 to the contents of register 2

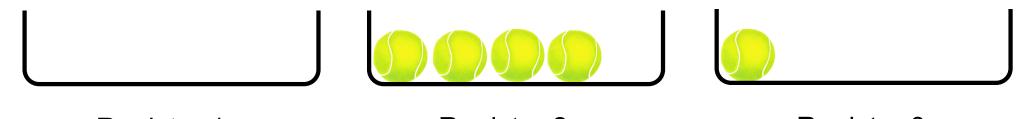

Register 1

Register 2

STEP	INSTRUCTION	REGISTER	GO TO STEP	[BRANCH TO STEP]
1.	Deb	1	2	3
2.	Inc	2	1	
3.	End			

Add the contents of register 1 to the contents of register 2

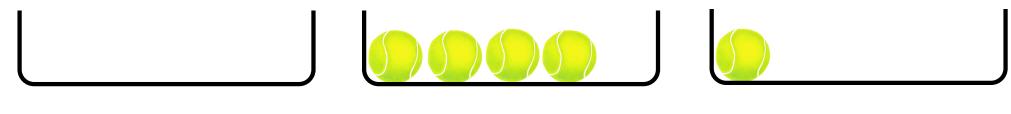

Register 1

Register 2

STEP	INSTRUCTION	REGISTER	GO TO STEP	[BRANCH TO STEP]
1.	Deb	1	2	3
2.	Inc	2	1	
3.	End			

Add the contents of register 1 to the contents of register 2

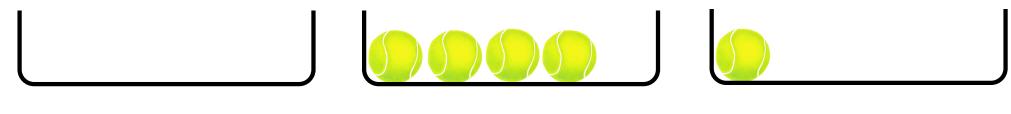

Register 1

Register 2

STEP	INSTRUCTION	REGISTER	GO TO STEP	[BRANCH TO STEP]
1.	Deb	1	2	3
2.	Inc	2	1	
3.	End			

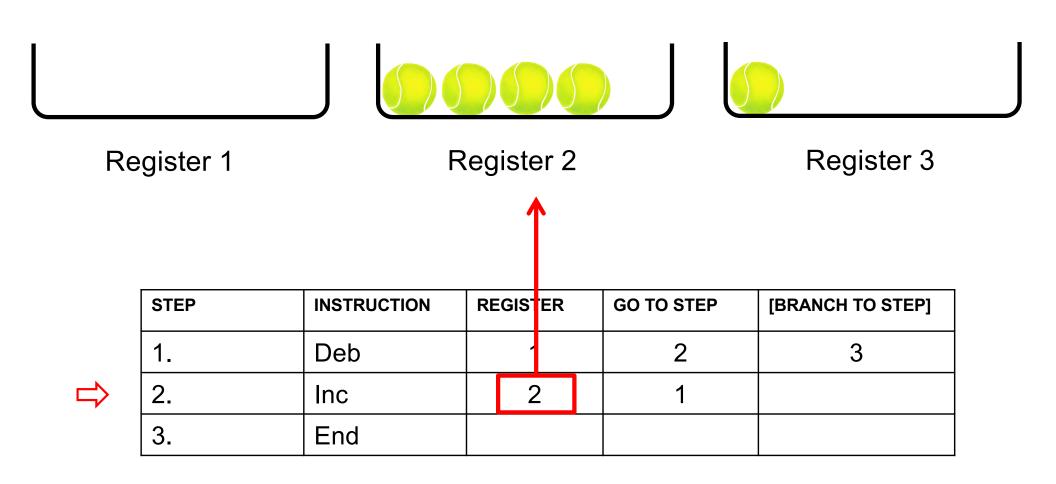

Add the contents of register 1 to the contents of register 2

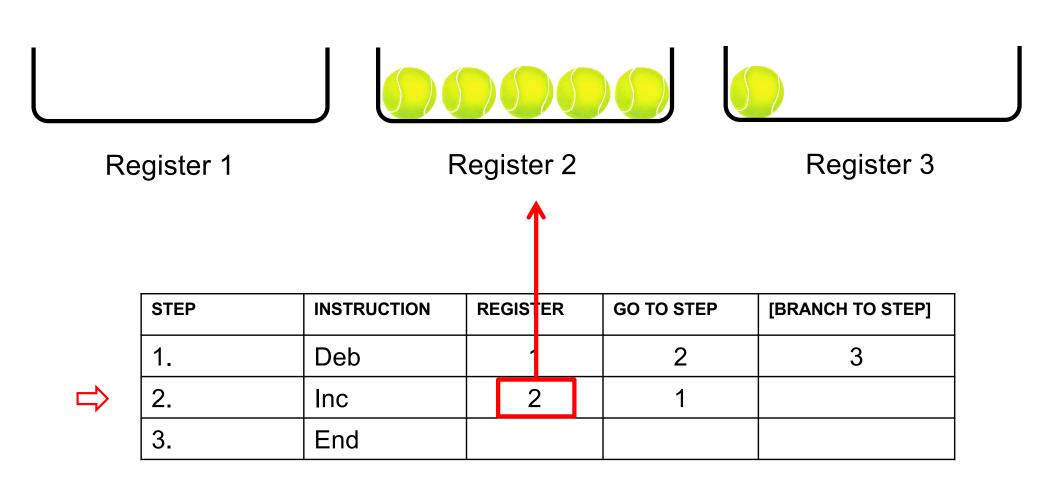

Register 1

Register 2

STEP	INSTRUCTION	RE	GISTER	GO TO STEP	[BRANCH TO STEP]
1.	Deb		1	2	3
2.	Inc		2	1	
3.	End				

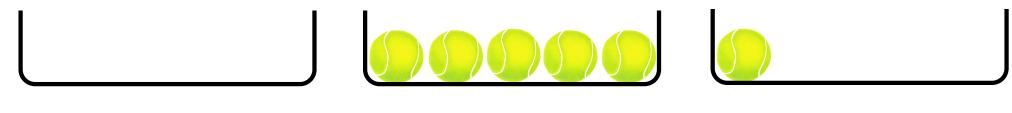

Add the contents of register 1 to the contents of register 2

Register 1

Register 2

S	STEP	INSTRUCTION	REGISTER	GO TO STEP	[BRANCH TO STEP]
1	۱.	Deb	1	2	3
2	2.	Inc	2	1	
3	3.	End			

Add the contents of register 1 to the contents of register 2

Register 1

Register 2

	STEP	INSTRUCTION	REGISTER	GO TO STEP	[BRANCH TO STEP]
	1. ←	Deb	1	2	3
•	2.	Inc	2		
	3.	End			

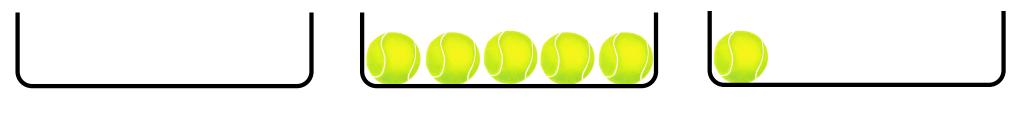

Add the contents of register 1 to the contents of register 2

Register 1

Register 2

STEP	INSTRUCTION	REGISTER	GO TO STEP	[BRANCH TO STEP]
1.	Deb	1	2	3
2.	Inc	2	1	
3.	End			

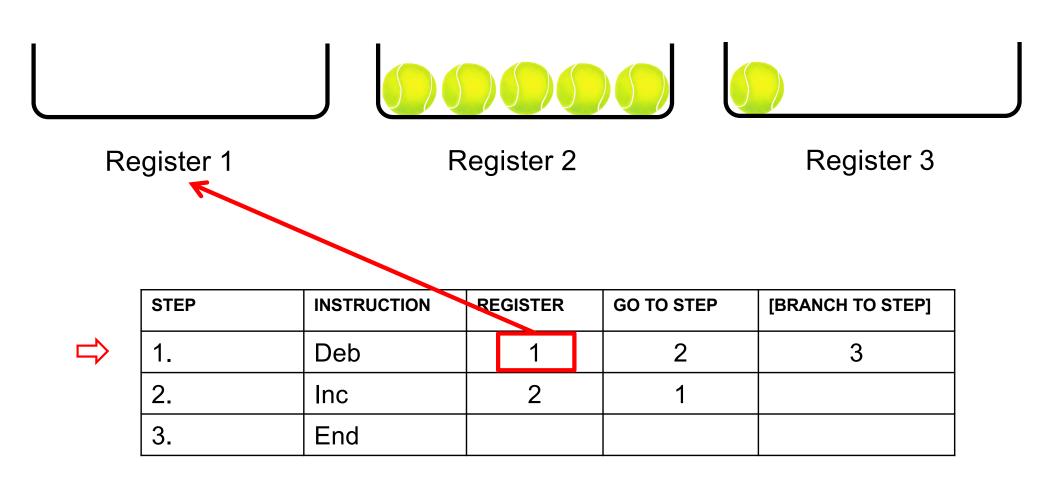

Add the contents of register 1 to the contents of register 2

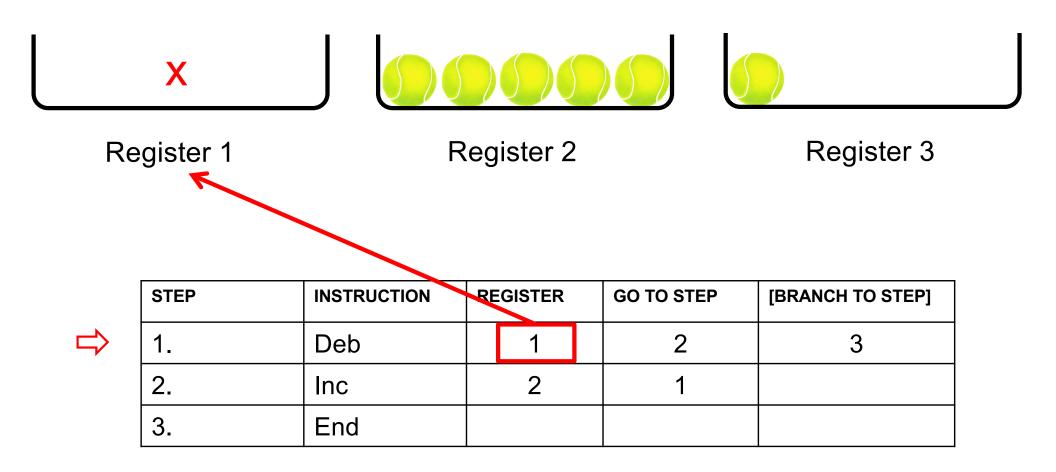

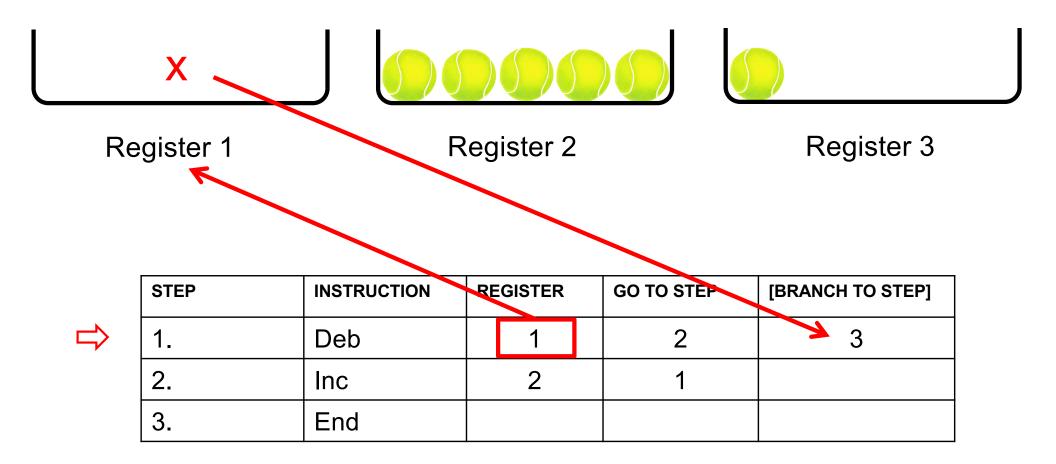

Register 1

Register 2

	STEP	INSTRUCTION	RE	GISTER	GO TO STEP	[BRANCH TO STEP]
•	1.	Deb		1	2	3
	2.	Inc		2	1	
	3.	End				

Add the contents of register 1 to the contents of register 2

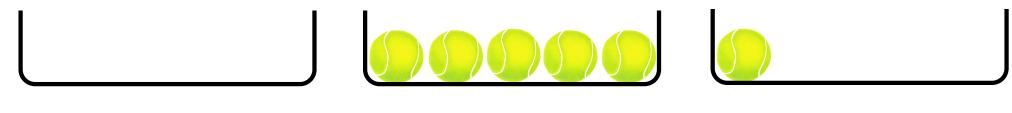

Register 1

Register 2

STEP	INSTRUCTION	REGISTER	GO TO STEP	[BRANCH TO STEP]
1.	Deb	1	2	3
2.	Inc	2	1	
3.	End			

Add the contents of register 1 to the contents of register 2

Register 1

Register 2

	STEP	INSTRUCTION	REGISTER	GO TO STEP	[BRANCH TO STEP]
>	1.	Deb	1	2	3
	2.	Inc	2	1	
	3.	End			

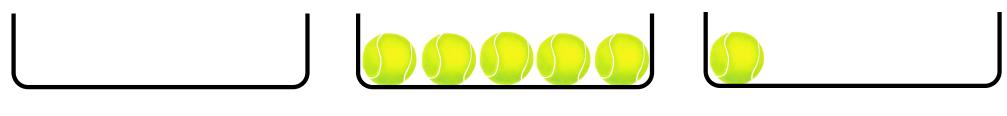

Add the contents of register 1 to the contents of register 2

Register 1

Register 2

STEP	INSTRUCTION	REGISTER	GO TO STEP	[BRANCH TO STEP]
1.	Deb	1	2	3
2.	Inc	2	1	
3.	End			

Add the contents of register 1 to the contents of register 2

Register 1

Register 2

STEP	INSTRUCTION	REGISTER	GO TO STEP	[BRANCH TO STEP]
1.	Deb	1	2	3
2.	Inc	2	1	
3.	End			

Same program, different initial conditions

STEP	INSTRUCTION	REGISTER	GO TO STEP	[BRANCH TO STEP]
1.	Deb	1	2	3
2.	Inc	2	1	
3.	End			

Some Questions

• Where do the balls that are deleted go?

• Where do the balls that are added come from?

Same program, different initial conditions

Add the contents of register 1 to the contents of register 2

Register 1

Register 2

STEP	INSTRUCTION	REGISTER	GO TO STEP	[BRANCH TO STEP]
1.	Deb	1	2	3
2.	Inc	2	1	
3.	End			

Another Program: Move the contents of register 2 to register 3

Register 1

Register 2

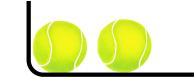

Register 3

STEP	INSTRUCTION	REGISTER	GO TO STEP	[BRANCH TO STEP]
1.	Deb	3	1	2
2.	Deb	2	3	4
3.	Inc	3	2	
4.	End			

Yet Another Program: Copy the contents of register 1 to register 3

Register 1

Register 2

Register 3

STEP	INSTRUCTION	REGISTER	GO TO STEP	[BRANCH TO STEP]
1.	Deb	3	1	2
2.	Deb	2	2	3
3.	Deb	1	4	6
4.	Inc	3	5	
5.	Inc	2	3	
6.	Deb	2	7	8
7.	Inc	1	6	
8.	End			

RodRego

You can download a register machine emulator from:

http://sites.tufts.edu/rodrego/

It works on both Macs and PCs. It's pretty cool.

This web link is also in the book chapter.

There is also a version that works in a browser: http://proto.atech.tufts.edu/RodRego/

What are the seven secrets?

Competence Without Comprehension - the register machine can do perfect arithmetic without having to comprehend what it is doing.

What a number in a register stands for depends on the program that we have composed.

Since the number in a register machine can stand for anything, this means that the register machine can, in principle, be designed to "notice" anything, to "discriminate" any pattern or feature that can be associated with a number – or a number of numbers.

Since a number can stand for anything, a number can stand for an instruction or an address.

All possible programs can be given a unique number as a name, which can then be treated as a list of instructions to be executed by a Universal machine.

All the improvements in computers since Turing invented his imaginary paper-tape machine are simply ways of making them faster.

There are no more secrets.

What about real computers?

• Do they really work in this way?

Questions?

THE END
