# Administrative Stuff

- The FINAL exam is scheduled for
- **Wednesday** Dec 13 @ 2:15 – 4:15 PM

# Final Exam Format

- **The exam will cover: Chapter 1 to Chapter 6, and Sections 7.1-7.2, register machines, and i281 CPU**
- **Emphasis will be on Chapter 5, 6, and 7**
- **The exam will be closed book but open notes.**
- **You can bring up to 5 pages of handwritten or typed notes.**

# Final Exam Format

- **The exam will be out of 135 points**
- **You need 95 points to get an A on this exam**
- **It will be great if you can score more than 100 points.**
  - **but you can't roll over your extra points ☹**

# Topics for the Final Exam

- **K-maps for 2, 3, and 4 variables**
- **Multiplexers (circuits and function)**
- **Synthesis of logic functions using multiplexers**
- **Shannon's Expansion Theorem**
- **1's complement and 2's complement representation**
- **Addition and subtraction of binary numbers**
- **Circuits for adding and subtracting**
- **Serial adder**
- **Latches (circuits, behavior, timing diagrams)**
- **Flip-Flops (circuits, behavior, timing diagrams)**
- **Counters (up, down, synchronous, asynchronous)**
- **Registers and Register Files**

# Topics for the Final Exam

- **Synchronous Sequential Circuits**
- **FSMs**
- **Moore Machines**
- **Mealy Machines**
- **State diagrams, state tables, state-assigned tables**
- **State minimization**
- **Designing a counter**
- **Arbiter Circuits**
- **Reverse engineering a circuit**
- **ASM Charts**
- **Register Machines and programs for them**
- **ALU, PC, and control for a simple processor (i281 CPU)**
- **Assembly and machine language (i281 assembly)**
- **Something from Star Wars**

# **Administrative Stuff**

- **Final Projects**

# Writing and Running a Program

# Writing and Running a Program

# Writing and Running a Program

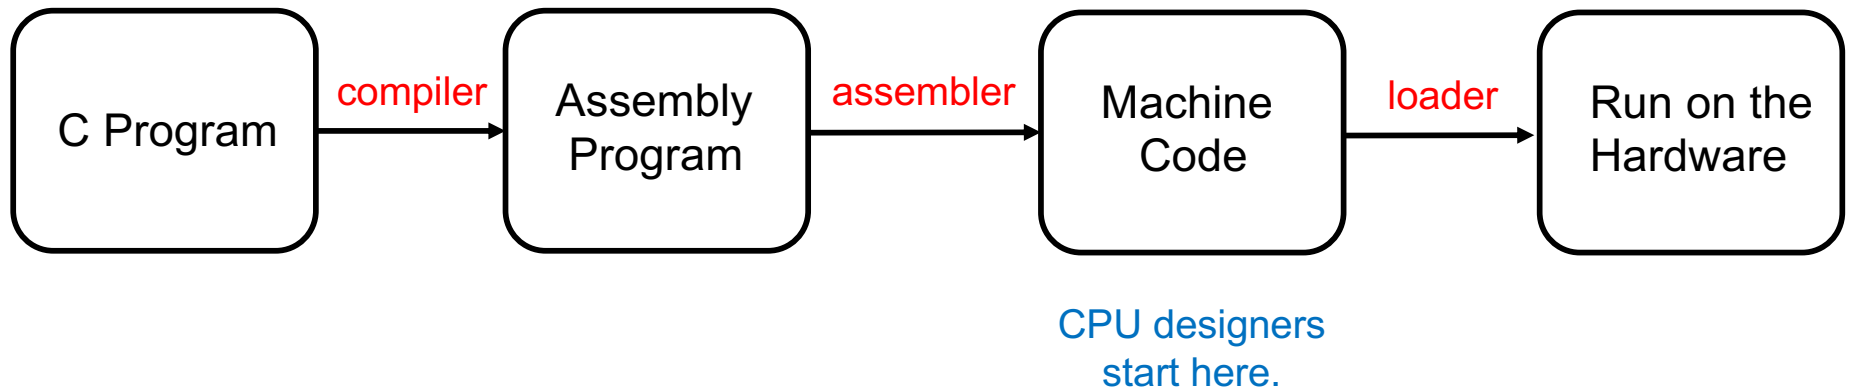

The programmer  
only writes this  
in a text editor.

# Writing and Running a Program

Nerds skip the first step and start here.

# Writing and Running a Program

**i281 Example:**  
**Add the numbers from 1 to 5**

**i281 Example:  
Add the numbers from 1 to 5**

**C Language v.s. Assembly Language**

# C Version

```
// C Version
//
// Add the numbers from 1 to 5 using a for loop.

int main()
{
    int N=5;
    int i, sum;

    sum=0;
    for(i=1; i<=N; i++)
        sum+=i;

    // printf("%d\n", sum);
}
```

# i281 Assembly Version

**.data**

```
N      BYTE    5
i      BYTE    ?
sum    BYTE    ?
```

**.code**

```
      LOADI   B, 0      ; sum=0
      LOADI   A, 1      ; i=1
      LOAD    D, [N]    ; register_D=N
Loop:  CMP     A, D      ; i<=N ?
      BRG     End      ; exit if i>N
Add:   ADD    B, A      ; sum+=i
      ADDI   A, 1      ; i++
      JUMP   Loop      ; next iteration
End:   STORE  [sum], B  ; update the memory for sum
```

**; Register allocation:**

**; A: i**

**; B: sum**

**; C: <not used>**

**; D: N**

# i281 Assembly Version

**.data**

```
N      BYTE    5
i      BYTE    ?
sum    BYTE    ?
```

**.code**

```
      LOADI   B, 0      ; sum=0
      LOADI   A, 1      ; i=1
      LOAD    D, [N]    ; register_D=N
Loop:  CMP     A, D      ; i<=N ?
      BRG     End      ; exit if i>N
Add:   ADD    B, A      ; sum+=i
      ADDI   A, 1      ; i++
      JUMP   Loop      ; next iteration
End:   STORE  [sum], B  ; update the memory for sum
```

**; Register allocation:**

**; A: i**

**; B: sum**

**; C: <not used>**

**; D: N**

# Add the numbers from 1 to 5

```
// C Version
// using a for loop

int main()
{
    int N=5;
    int i, sum;

    sum=0;
    for(i=1; i<=N; i++) {
        sum+=i;
    }

    // printf("%d\n", sum);
}
```

```
; Assembly Version

.data
N        BYTE    5

```

# Add the numbers from 1 to 5

```
// C Version
// using a for loop

int main()
{
    int N=5;
    int i, sum;

    sum=0;
    for(i=1; i<=N; i++) {
        sum+=i;
    }

    // printf("%d\n", sum);
}
```

**i=1**

```
; Assembly Version

.data
N        BYTE    5
i        BYTE    ?
sum      BYTE    ?

.code

        LOADI   B, 0        ; sum=0
        LOADI  A, 1        ; i=1
        LOAD    D, [N]      ; register_D=N
Loop:   CMP     A, D        ; i<=N ?
        BRG     End        ; exit if i>N
Add:    ADD     B, A        ; sum+=i
        ADDI   A, 1        ; i++
        JUMP   Loop        ; next iteration
End:    STORE   [sum], B    ; write B to sum
```

# Add the numbers from 1 to 5

```
// C Version
// using a for loop

int main()
{
    int N=5;
    int i, sum;

    sum=0;
    for(i=1; i<=N; i++) {
        sum+=i;
    }

    // printf("%d\n", sum);
}
```

This has no analog in the C version,  
which is written in a high-level language.

```
; Assembly Version

.data
N        BYTE    5
i        BYTE    ?
sum      BYTE    ?

.code

        LOADI   B, 0        ; sum=0
        LOADI   A, 1        ; i=1
        LOAD    D, [N]      ; register_D=N
Loop:   CMP     A, D        ; i<=N ?
        BRG     End        ; exit if i>N
Add:    ADD     B, A        ; sum+=i
        ADDI   A, 1        ; i++
        JUMP   Loop        ; next iteration
End:    STORE   [sum], B    ; write B to sum
```

Load the value of N into register D.

# Add the numbers from 1 to 5

```
// C Version
// using a for loop

# The OPCODEs for this CPU

NOOP	NO OPERation
INPUTC	INPUT into Code memory
INPUTCF	INPUT into Code memory with offset
INPUTD	INPUT into Data memory
INPUTDF	INPUT into Data memory with offset
MOVE	MOVE the contents of one register into another
LOADI	LOAD Immediate value
LOADP	LOAD Pointer address
ADD	ADD two registers
ADDI	ADD an Immediate value to a register
SUB	SUBtract two registers
SUBI	SUBtract an Immediate value from a register
LOAD	LOAD from a data memory address into a register
LOADF	LOAD with an offset specified by another register
STORE	STORE a register into a data memory address
STOREF	STORE with an offset specified by another register
SHIFTL	SHIFT Left all bits in a register
SHIFTR	SHIFT Right all bits in a register
CMP	CoMPare the values in two registers
JUMP	JUMP unconditionally to a specified address
BRE	BRanch if Equal
BRZ	BRanch if Zero
BRNE	BRanch if Not Equal
BRNZ	BRanch if Not Zero
BRG	BRanch if Greater
BRGE	BRanch if Greater than or Equal

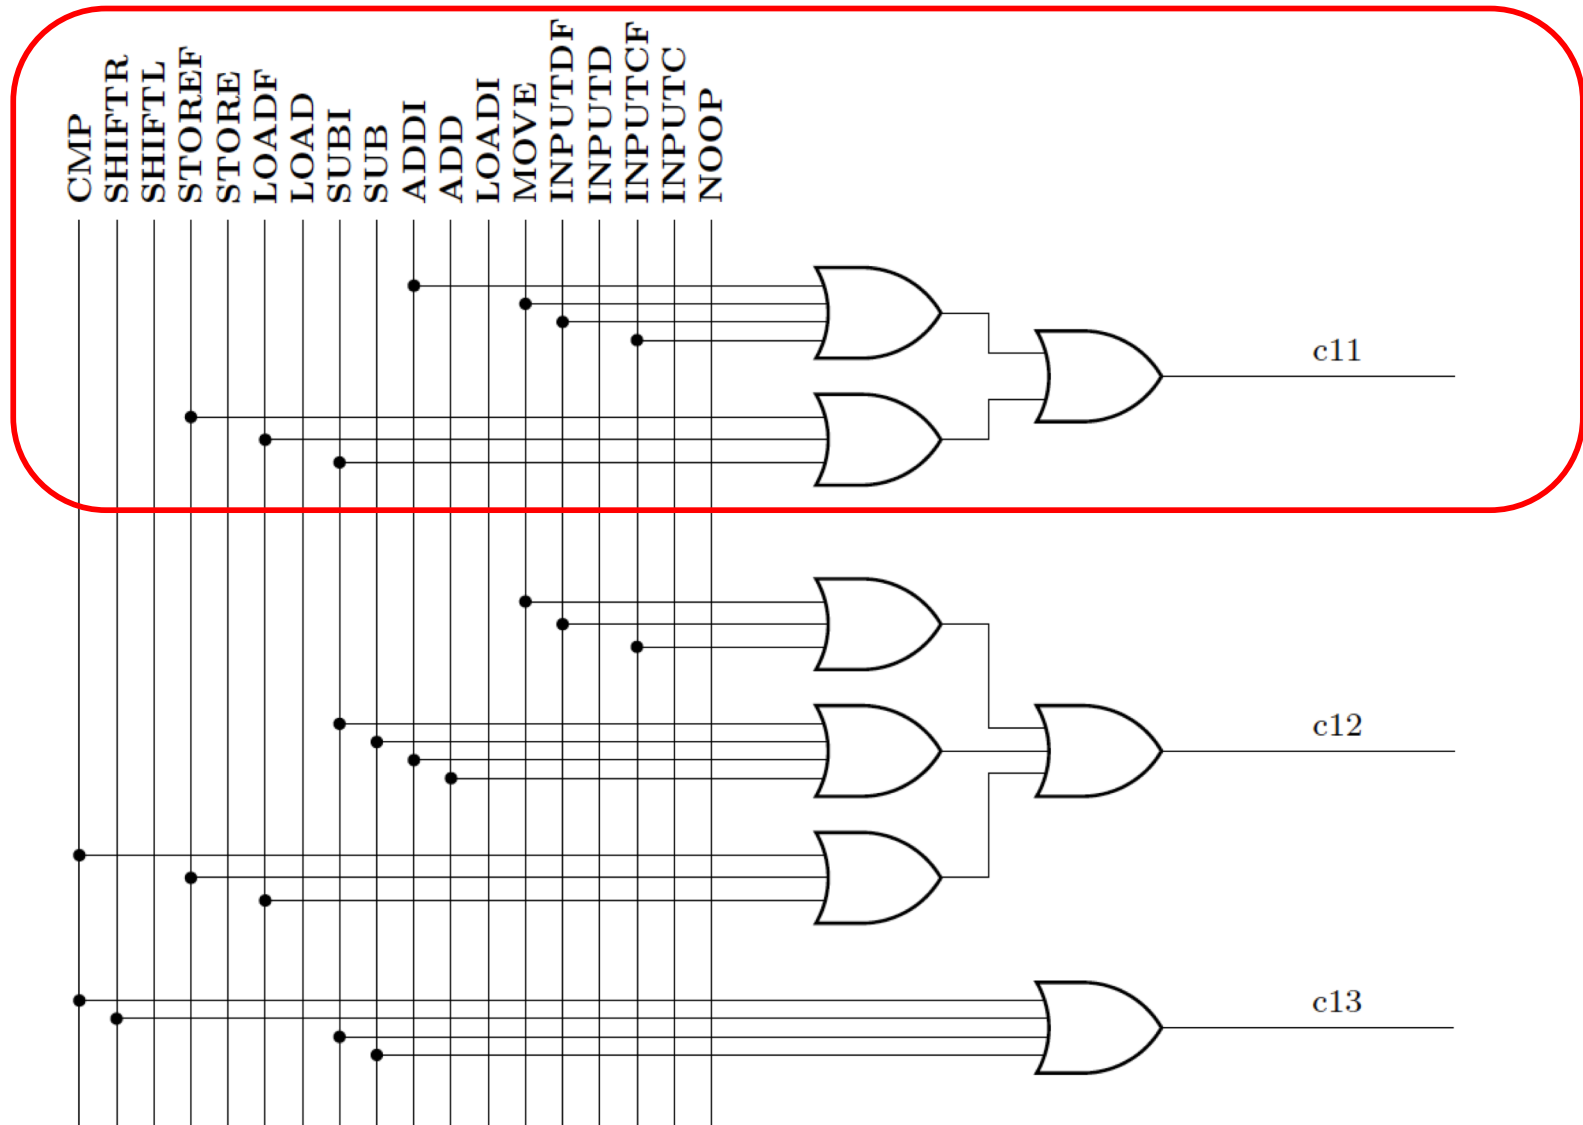

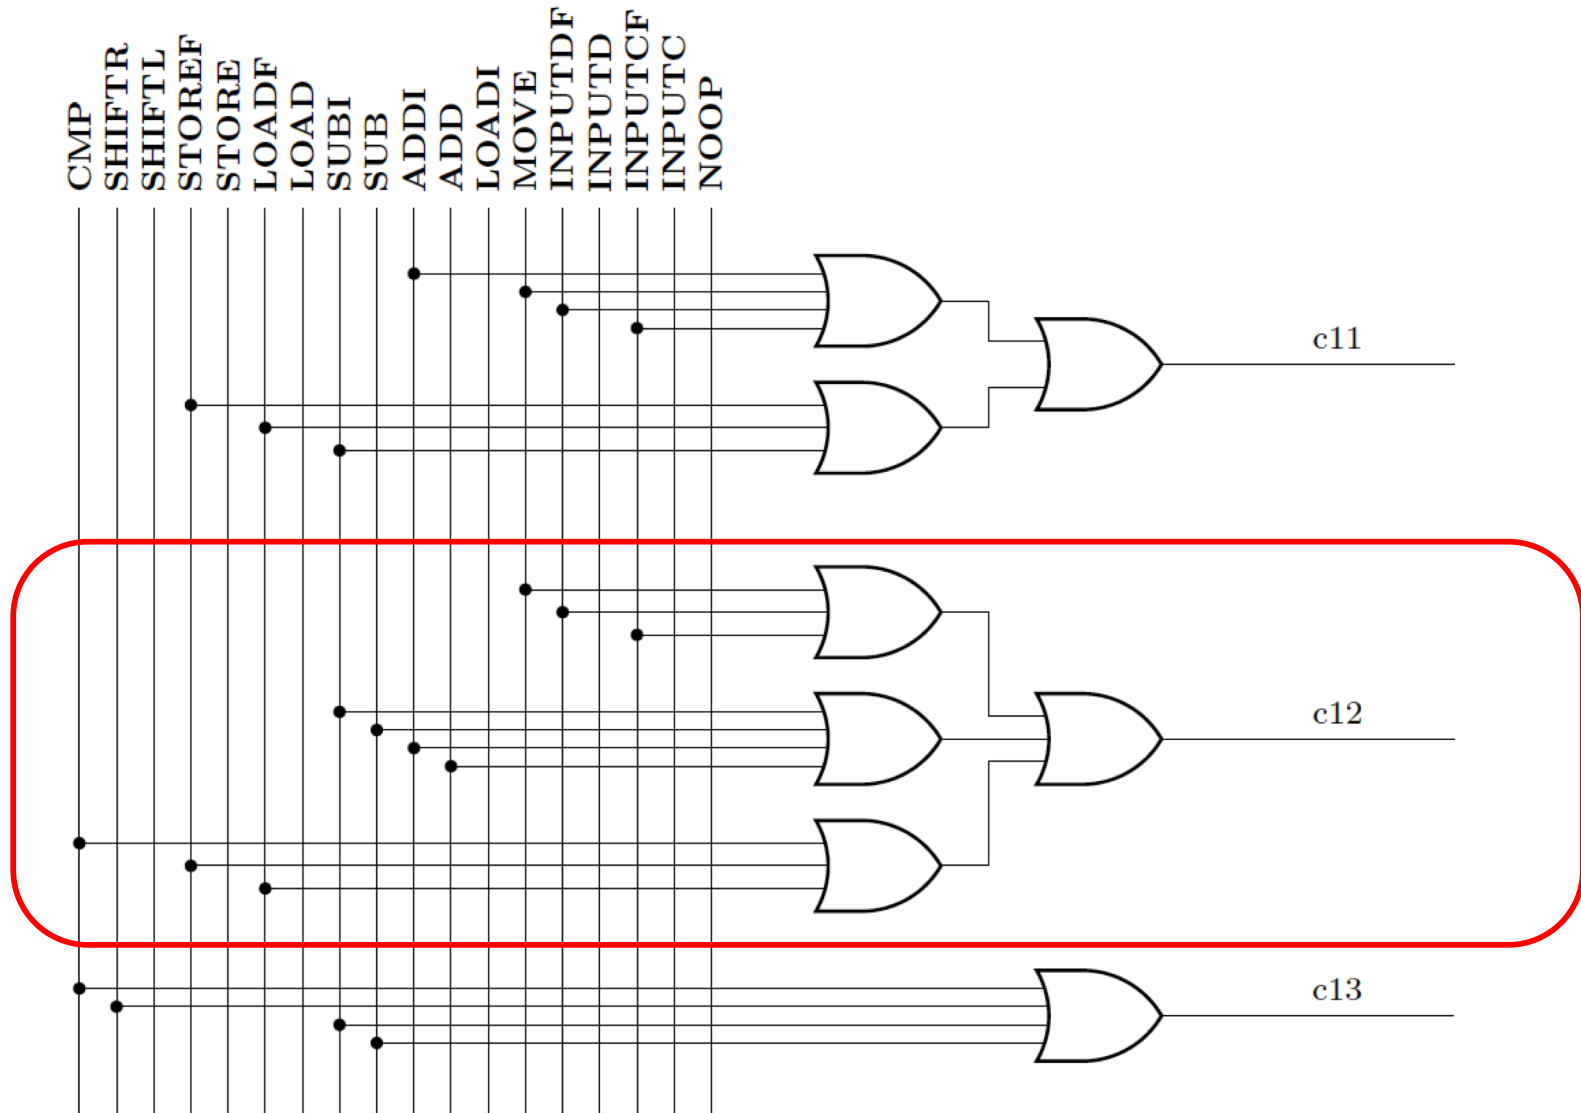

# The Wiring Diagram for $c_{11}$

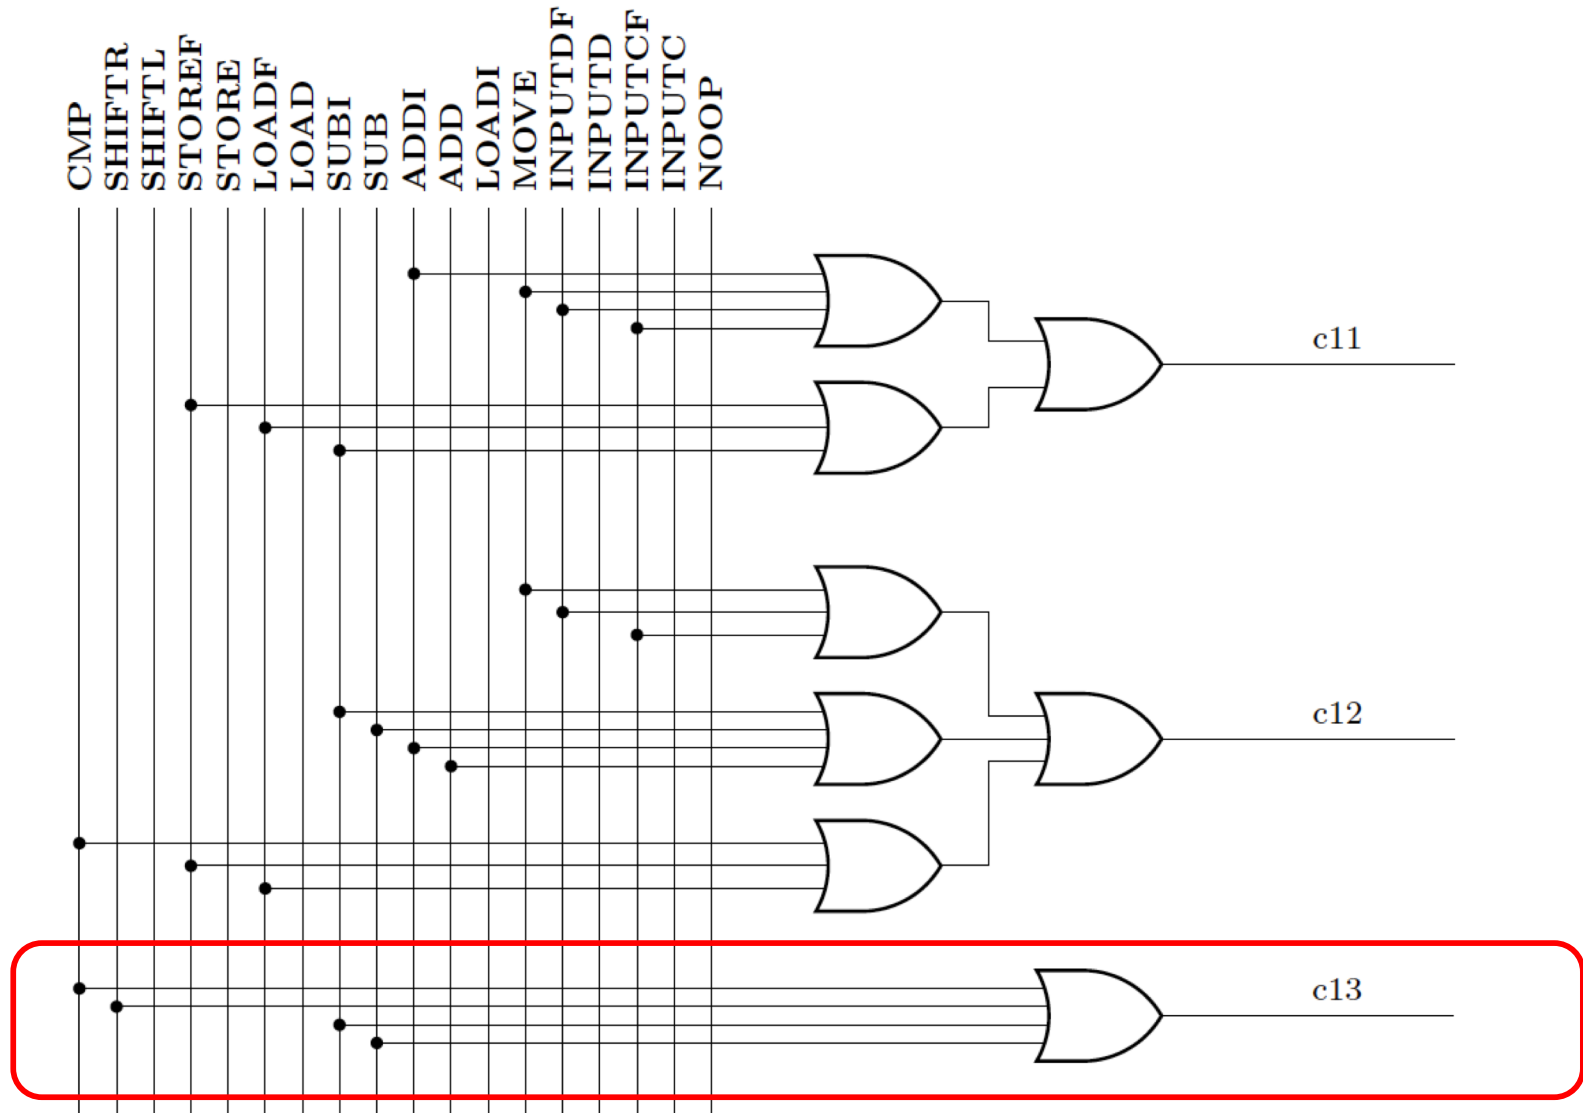

# The Wiring Diagram for $c_{12}$

# The Wiring Diagram for $c_{13}$

# **Simulation of the Program Execution**

# Add the numbers from 1 to 5

```
// C Version
// using a for loop

int main()
{
    int N=5;
    int i, sum;

    sum=0;
    for(i=1; i<=N; i++) {
        sum+=i;
    }

    // printf("%d\n", sum);
}
```

```
; Assembly Version

.data
N        BYTE    5
i        BYTE    ?
sum      BYTE    ?

.code

        LOADI   B, 0        ; sum=0
        LOADI   A, 1        ; i=1
        LOAD    D, [N]      ; register_D=N
Loop:   CMP     A, D        ; i<=N ?
        BRG     End        ; exit if i>N
Add:    ADD     B, A        ; sum+=i
        ADDI   A, 1        ; i++
        JUMP   Loop        ; next iteration
End:    STORE   [sum], B    ; write B to sum
```
